Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3764

Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Sollenberger.

Note element 20 of Sollenberger.

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harvey in view of Standish.

Harvey discloses a device comprising a member Fig. 4 having a handle (10) and an elongated shaft (66) and weight members (92) said shaft and said handle being cylindrical and said handle being knurled.

Harvey however fails to disclose his device as including a handle having a bore.

Standish discloses a device wherein his handle member includes a bore.

Given the above teaching of Standish having a bore the examiner notes that it would have been obvious to one of ordinary skill in the art to manufacture the handle member of Harvey as being hollows for the purpose of saving cost as opposed to manufacturing a similar handle of a solid material.

Art Unit: 3764

Claims 1-4 rejected under 35 U.S.C. 102(b) as being anticipated by Brice.

Brice discloses a device comprising a member having a knurled handle (12), a shaft (60) having knurls/threads weight members 46, 64 said handle member having a bore, a slot in the form of an allen opening (62).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the handle member (12) and shaft member (22) of Dirksing et al.

Note the overall device of Caporali et al, Whipps and Roy.
